

DIPLODOCUS

dinosaur

A tiny head,
a neck so long,

its **whip-like** tail
went on and on.

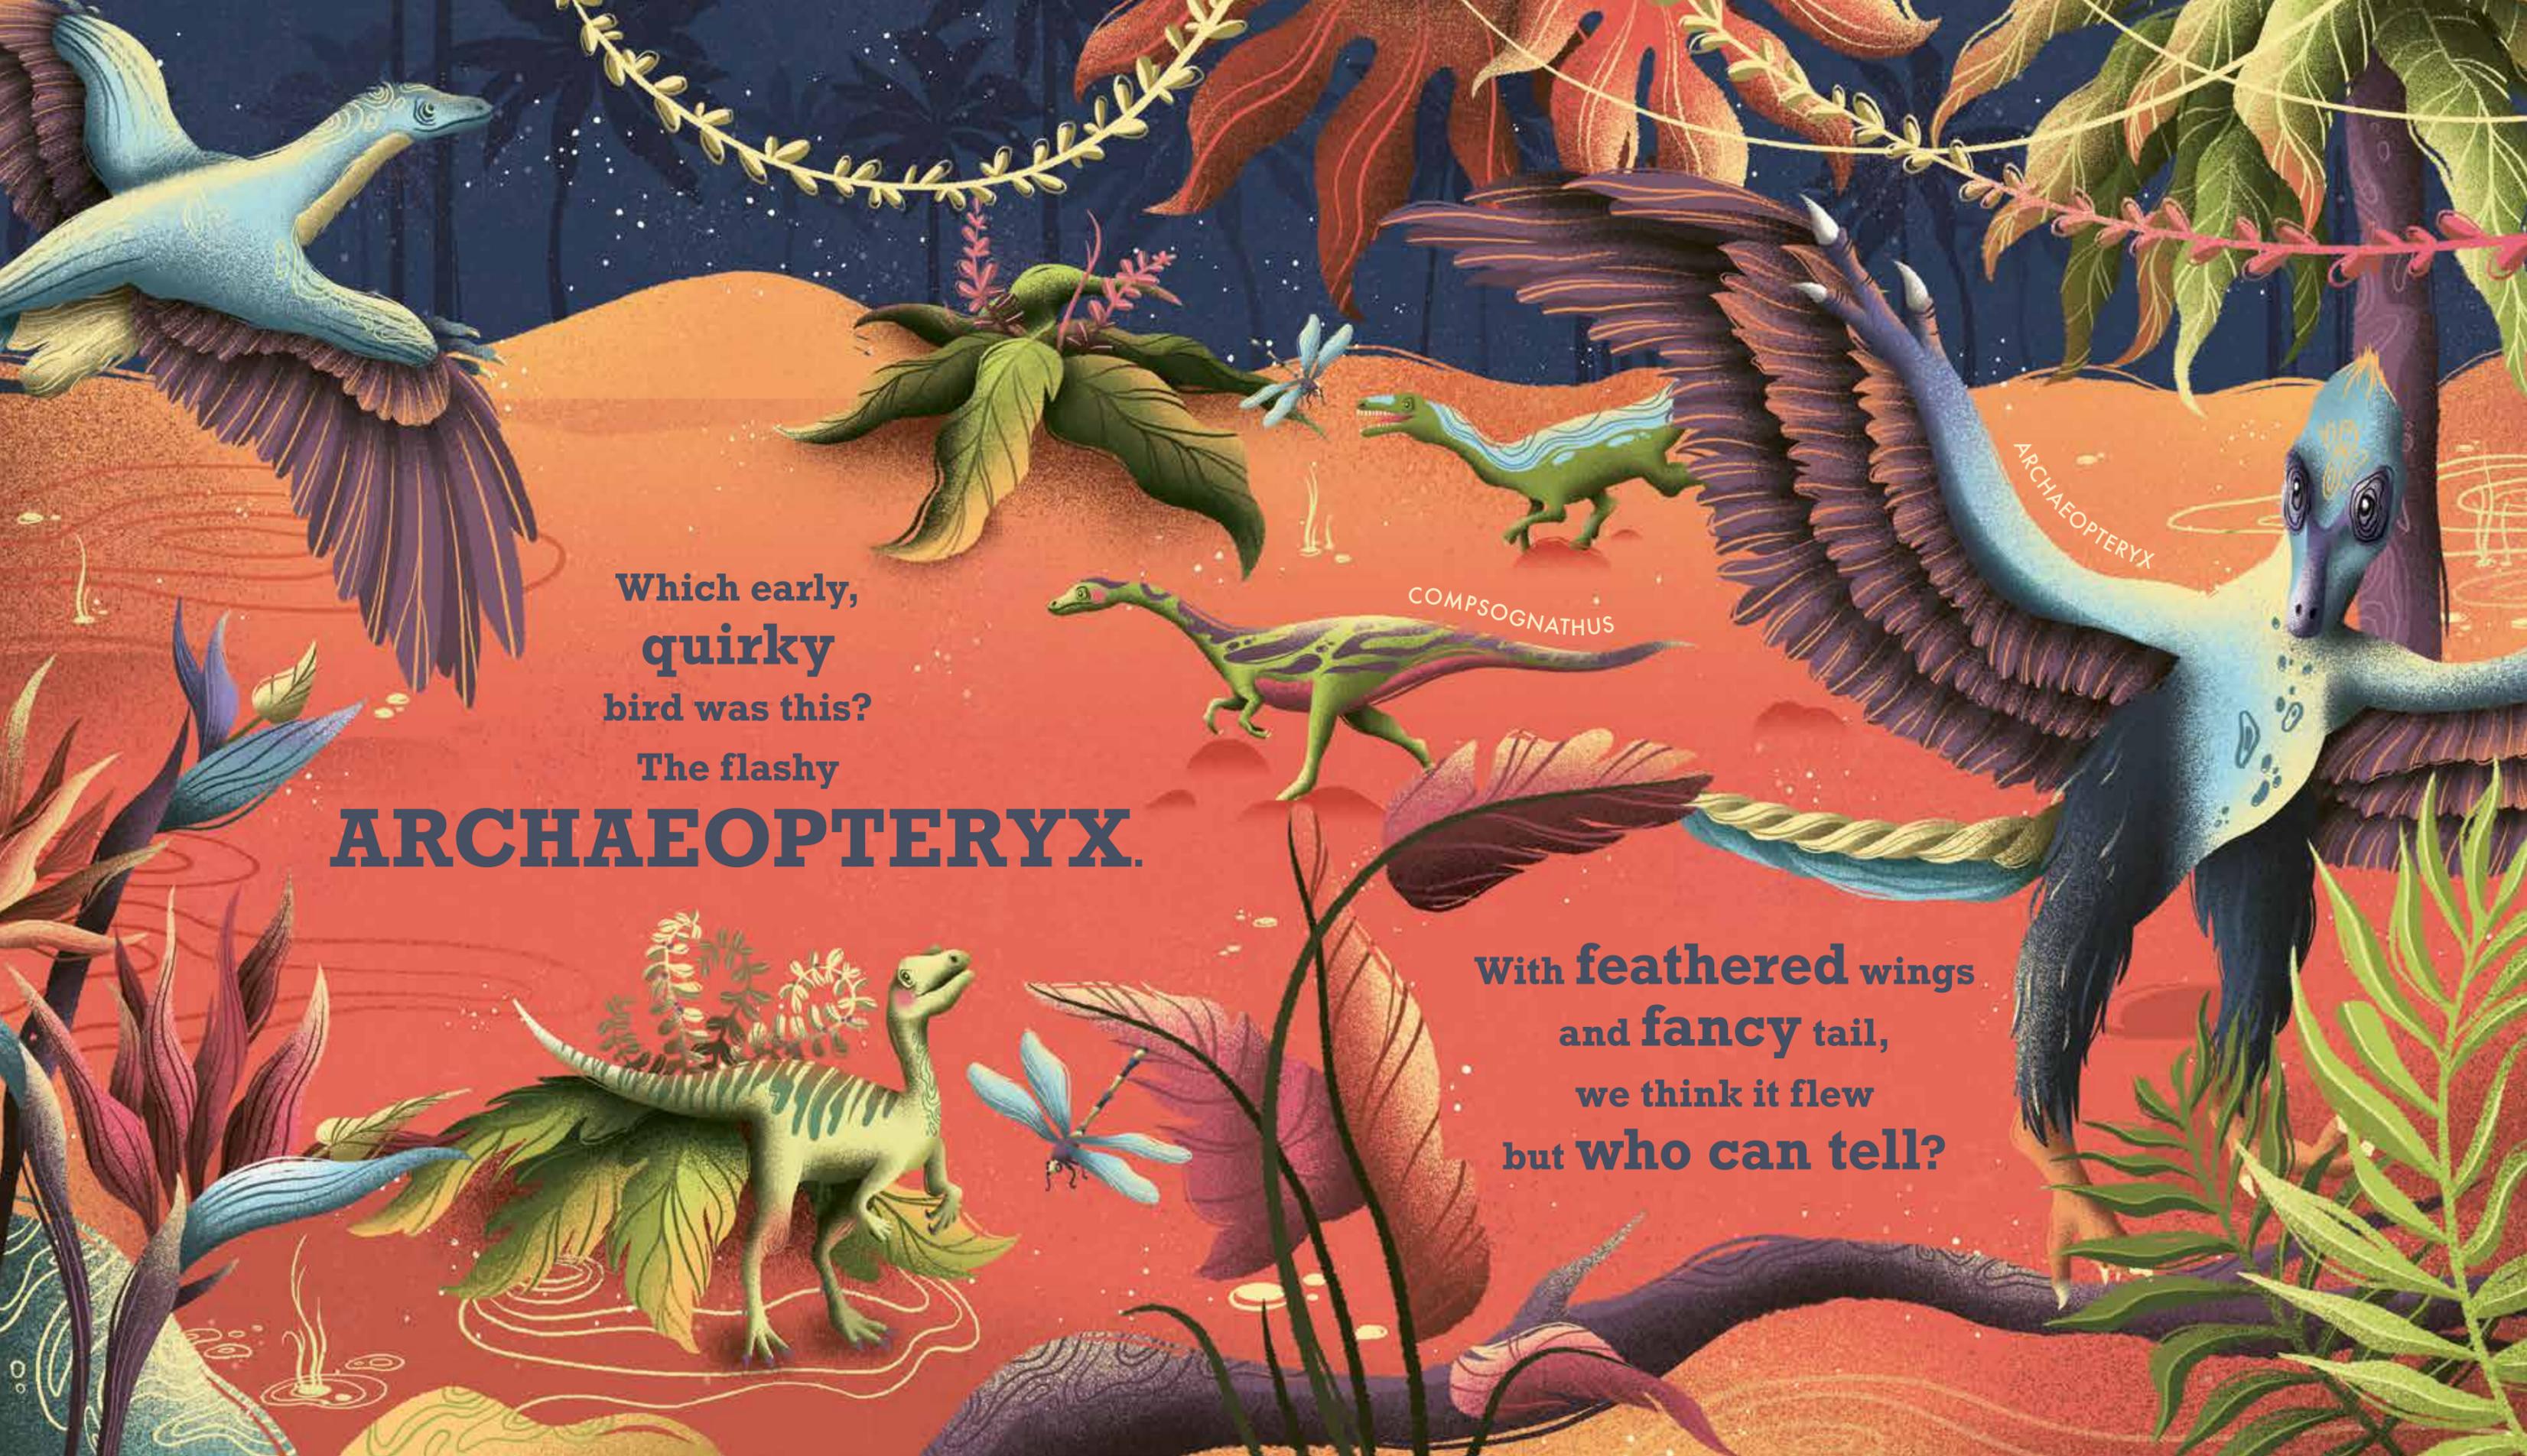

was in fact a
herbivore!

ALLOSAURUS

DIPLODOCUS

APATOSAURUS

Which early,
quirky
bird was this?

The flashy

ARCHAEOPTERYX.

COMPSOGNATHUS

ARCHAEOPTERYX

with **feathered** wings
and **fancy** tail,
we think it flew
but **who can tell?**
