

Psssst. Wanna see a llama?

Yes, please!  
But where?

You leave that to me.  
Come on.

Llamas are easy to find when you know what to look for. Luckily, I'm a llama expert.

Llamas have four legs, a tail—and look! Over there!

Erm . . . that's a *camel*.  
Llamas don't have humps.

You're right. Just testing.  
Follow me.
